## SEPE ENGINEERING SRL

SEPE Engineering Srl is a multi skills Engineering Company, a leading company in the field of air conditioning and air treatment systems and special industrial plants and tailor made installations.

SEPE Engineering Srl was founded in 2008 after many years of experience in the Confectionery Industry, installing industrial plants all around the world for a multi-national sweets and chewing gum manufacturer.

We are based in Seregno, in the Milan Industrial area, but 80% of our work is performed outside of Italy, mainly in Europe and Africa.

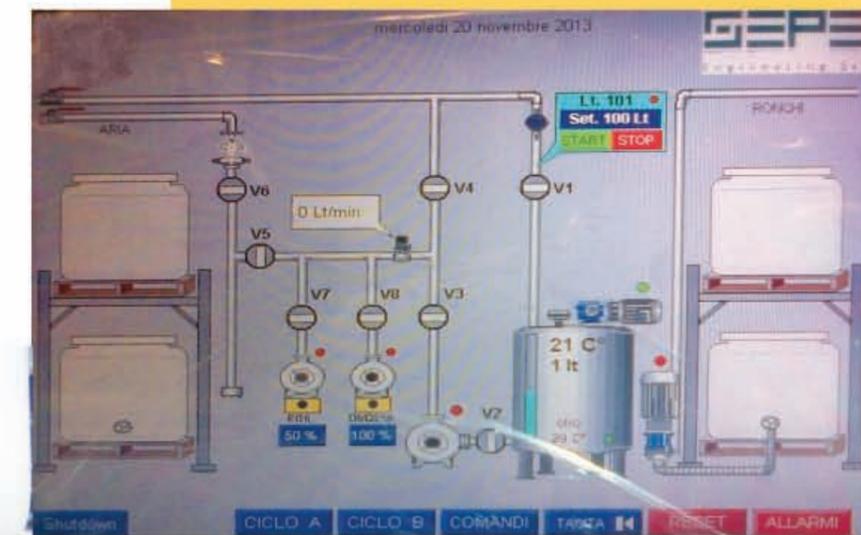

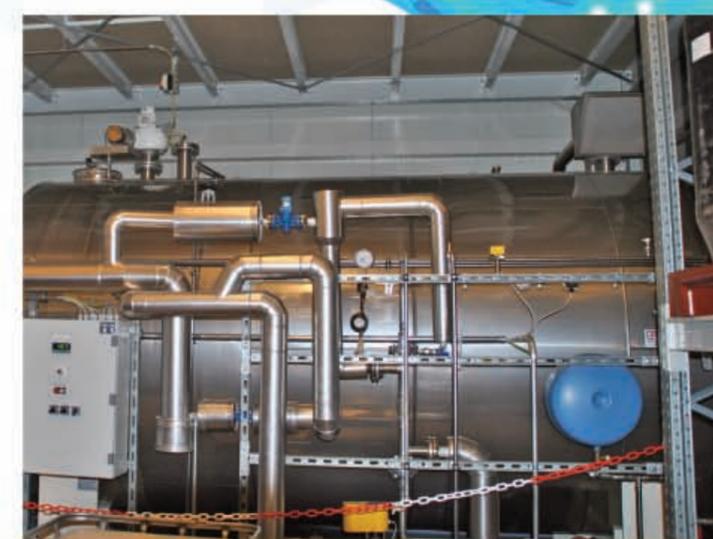

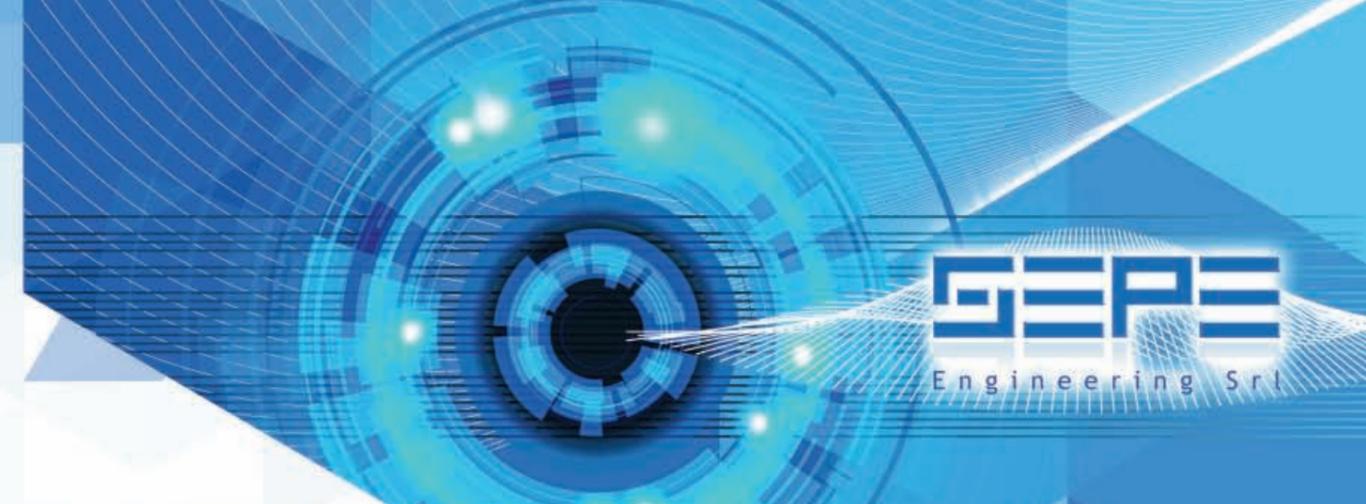

### NEW SOLUTIONS FOR YOUR FACTORY

- > **Layout study production/wrapping department:** we perform a prestudy on AutoCad on the positioning of the various production machines inside the department, working together with your technical team.
- > **Utilities system design:** calculation of air conditioning; humidity control systems for your department; special studies for air treatment; correct setting of the size of the general utilities in your factory.
- > **Technical consultancy:** we act as mediators with your suppliers, for quotation requests, economic and technical comparisons, FAT.
- > **Design of green-field factories** or expansion of your existing business.

## AN OPEN MIND: THE REASON OF A SUCCESSFUL BUSINESS

The real ace in the hole of SEPE Engineering Srl is an open minded approach to problems, supported by a wide range of knowledge and skills: it allows us to be easily in touch with every customer, analyzing problems from several points of view. Our know-how includes design of HVAC systems, industrial supplies, general and specific layout design: starting from our customer's needs, SEPE Engineering technicians are able to study every condition and propose excellent solutions relying upon our extensive inside knowledge.

**OUR MISSION  
IS TO PROVIDE  
CUSTOMIZED  
SOLUTIONS  
FOR EACH  
NEED,  
LEADING THE  
PROJECT  
FROM DESIGN TO  
MANUFACTURING  
AND ITS  
FOLLOW-UP.**
